

Data Breach Triage

When you've done everything possible to protect your organization and hackers still manage to attack you where it hurts, it's imperative that you not only rush to stop the bleeding, but also tend to the wound. ID's Tiger Breach Triage Team is locked and loaded with the experience, agility, and sensitivity to your situation to get you through the entire breach response process, start to finish, as quickly and smoothly as possible.

THE TIGER BREACH TRIAGE TEAM WILL SWIFTLY:

MITIGATE

Mitigate the attack and stop any potential ex-filtration or further contamination.

TRIAGE AFFECTED SYSTEMS

Triage affected systems and determine the level of compromise.

IDENTIFY AFFECTED SYSTEMS

Identify affected systems and segregate them from uncontaminated resources and data.

UTILIZE NETWORK FORENSICS

Determine what (if any) data leakage occurred and provide a report on potential data loss.

REMEDIATION PLAN

Provide a remediation plan to reduce the risk going forward by addressing all the findings.

MANAGED DOCUMENT REVIEW

Complete managed document review, searching your breached information for personal and protected data.

CAN YOU HELP US DETERMINE THE SOURCE OF THE BREACH?

Of course. Our team will identify the source of the attack, fix the hole, and then remediate any other affected systems.

WHAT STEPS ARE TAKEN TO ENSURE WE AREN'T BREACHED AGAIN?

While no one can guarantee that you will never be breached, ID will work with you to determine weaknesses and put safeguards and policies in place to better secure your data for the future.
