

# Digital Forensics

Innovative Discovery can collect active, deleted, corrupted, and non-traditional data from anywhere in the world. We assist in preserving your data, maintaining chain of custody, and securing it from modification and/or deletion. When you are hunting for evidence that doesn't leave a paper trail, our team will look for red flags in your data set to help you bring potential evidence to light.

## ID FORENSICS SOLUTION PROVIDES:

### THE SMARTS

Our experts are seasoned investigators, capable of finding hidden and deleted data to help you tell your true and complete story.

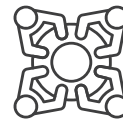

### TRANSPARENCY

We provide insight into where your data is, where it is going, and the cost associated with your project while proving the proper chain of custody.

### VARIOUS COLLECTION METHODS

We consult with you on your case to determine the collection method most suited to your needs.

### ANALYSIS AND CONSULTING

ID consults with you to deploy a comprehensive strategy that best suits the needs of your litigation or regulatory requirements

## HOW DOES FORENSICS DIFFER FROM EDISCOVERY?

More than finding, culling, and producing data, forensics is a deep dive investigation into your data. Our experts find missing information and analyze it to produce our clients with useful evidence.

## CAN ID HELP FIND HIDDEN DATA?

Our experts can collect and preserve hidden, deleted, and non-traditional data types, and manage industry-leading technologies and investigative tools.

## WHAT ARE ID'S CREDENTIALS AND EXPERIENCE?

Our forensic experts hold a variety of certifications, including C|HFI, EnCE, C|EH, and ACE, have vast experience with complex forensic data analysis, and have been utilized as expert witnesses in preservation, proper forensic methodologies, and various forms of analyses.
