

Collections

The proper data collection and preservation lay the groundwork for your legal discovery. The process is complex and requires a speedy, defensible approach. Innovative Discovery offers options and tailor-made work flows that build what best fits YOUR organization, technology, and comfort level with the process.

ID PROVIDES A VARIETY OF COLLECTION METHODS:

ON-SITE COLLECTION - WE CONNECT, WE DRIVE

With a "boots on the ground" collection, our experts come to you and perform the collection, ensuring a defensible and secure approach.

COLLABORATIVE COLLECTION - YOU CONNECT, WE DRIVE

Our experts send you a drive with our tools, you connect, and we login to your system and collect your data from afar, providing you with flexibility AND a collection you can have confidence in.

CONSULTATIVE COLLECTION - YOU CONNECT & DRIVE, WE CONSULT

Consultative remote collection – our experts "shoulder surf," providing guidance and monitoring, while your IT team handles collection.

Self-collection – you can collect your data and send to us for preservation, hosting, and/or analytics.

WHAT IS THE MOST COST-EFFECTIVE METHOD OF DATA COLLECTION?

Remote collection has become the go-to method in the industry because it saves time and money. ID has a wealth of experience with these types of collections.

HOW CAN ID SAVE US MONEY DURING A COLLECTION?

By only collecting what you need. We won't clutter your hosting platform or review with unnecessary data.
