

Constructing personalized workflows for your case.

With multiple interested and connected parties and massive data sets, construction litigation faces its own set of discovery challenges. Innovative Discovery has the experience and know-how to guide you through the information lifecycle to help you identify your relevant information, saving you time, money, and headaches.

ID SURPASSES THE COMPETITION BY PROVIDING:

EXPERIENCE WITH UNUSUAL DATA TYPES

The frequent use of tablets, cell phones, CAD drawings, etc., makes for a wide variety of data types - and ID has seen, and collected, them all. We can collect, process, and review any data type you can imagine with ease.

END-TO-END SERVICES

Our end-to-end services provide technology-agnostic solutions from forensics through analytics and managed review to final production. Having a partner through every step of the information lifecycle creates seamless workflows and consistent results.

LEGAL TECHNOLOGISTS

We have multiple disciplines working on your matter - our lawyers understand technology and our technologist understand legalese. Our experts will consult on the tools you need - clustering, data analytics, continuous active learning - to bring your relevant data to light.

ANALYTICS

We understand the need for options and tailor-made workflows to fit YOUR organization. Our team of experts will work with you to pick the best analytics and workflows for your case, leaving you with only the hot documents you need and a complete understanding of how we collected them.

COLLECTIONS

ID offers our clients a variety of collection methods, including remote collection, to help you gather the reliable evidence you need for your case. We can collect from any construction platform and will use the process and technologies that best fit your needs.

TOP-NOTCH PROJECT MANAGEMENT
