

Helping to keep your data in picture perfect health.

Healthcare companies house some of the most private information in the world and in one of the most litigious industries. Top-notch security and data management protocols aren't luxuries - they are necessities. Innovative Discovery consults with healthcare companies to set up policies and procedures to help protect sensitive data. Should you find yourself in litigation, ID has the tools and knowledge you need to win your case and maintain privacy.

ID SURPASSES THE COMPETITION BY PROVIDING:

FEDRAMP

This highly-sought-after authorization allows us to offer a secure, cloud-based environment for government data and we proudly utilize those best practices for our business

INFORMATION GOVERNANCE AND CYBER SECURITY

ID works with clients to build data retention policies, helping to reduce your data footprint and your risk of exposure. We can help identify potential vulnerabilities and implements on-going monitoring procedures.

DATA BREACH TRIAGE

ID's Tiger Breach Triage Team identifies the source of the attack, treats the affected systems, helps you put policies in place to safeguard against future attacks, and searches your breached data for personal and protected information.

ANALYTICS

We understand the need for options and tailor-made workflows to fit YOUR organization. Our team of experts will work with you to pick the best analytics and workflows for your case, leaving you with only the documents relevant to your case and a complete understanding of how we collected them.

LEGAL HOLD

Relativity Legal Hold is a defensible, efficient, and comprehensive toll that enables organizations to effectively manage all data and correspondence in one centralized location.

CONCIERGE-LEVEL SERVICE

We pride ourselves on providing prompt, customized service every step of the way. Our team invests in your organization and your data, so you receive boutique-style attention from top-notch experts.
