

Software and Technology

Innovative Discovery uses best-of-breed tools to build you a customized workflow that accomplishes your goals. By integrating industry-leading applications into each project, led by the expertise of our technology know-it-alls, ID's clients rest assured they have everything they need for the matter at hand.

ID FUELS OUR PROJECTS WITH A CUSTOMIZED MIX OF THE FOLLOWING TOOLS:

BLACKOUT

Only Blackout can automatically redact and mark up native Excel content and image files in Relativity. Blackout allows you to create rules and then apply them against a document set to redact documents at high-speed and high-volume.

BRAINSPACE

Brainspace accelerates the process of identifying what matters by translating complex data into intuitive graphics so you can identify patterns and relationships quickly.

BROADCAST

Broadcast allows Relativity users to choose from a range of charts and graphs to create detailed reports and share them easily with stakeholders, review teams, and clients.

CHRONICLE

Chronicle streamlines the process of assembling a privilege log by using templates that recognize both Relativity fields and dynamic custom fields, while allowing users to view & revise in real-time.

IBM

IBM provides clients with upgrades and solution modernization of their IBM software, design and implementation of IBM solutions, and managed services. ID is an IBM Gold Level Business Partner and has implemented these solutions more than any other partner.

Software and Technology

ID EMAIL MANAGER

ID Email Manager (IEM) is an email governance solution that leverages our proprietary technologies to help reduce email retention, retain high business value email, and properly classify email records.

IDENTIFY FILE ANALYSIS

Identify provides an end-to-end process for discovering, decisioning, and acting on data cleanup so you can quickly and easily reduce your file share redundant, obsolete, and trivial (ROT) data.

NUIX

From early case assessment and investigation to document review, NuiX delivers a unique visual approach that lets legal teams and litigation support master the details of any legal matter.

ONETRUST

OneTrust is a privacy management and marketing compliance technology helping organizations comply with global regulations like GDPR.

VECTOR FOR CONTENT

ID's Vector for Content supports batch processing of large volumes of content allowing for fast migrations and system integrations.
