

IBM & Innovative Discovery

We invest in YOU! The team at ID places a high degree of value on client relationships. Spending time with you and other key stakeholders, we seek to understand your business, market, objectives, and goals. Our expert IBM consultants work to find a tailored solution that will have you smiling when you say the words “awesome return on investment” and “Innovative Discovery” in the same sentence. That said, here is a bit of information about how we help our clients tackle Modernization using IBM Hybrid Cloud solutions!

Innovative Discovery helps clients get the most value from their software investments through:

UPGRADES AND MODERNIZATION

ID works as an extension of your team to identify necessary system updates and help you execute them effectively. You've invested in the best tools, and we will help you keep them performing at their best.

DESIGN AND IMPLEMENTATION

We're proud to be recognized as the Top IBM ECM Consultant, as well as a worldwide governance award-winner by IBM. That said, you can trust that we will work with your team(s) to build a solution tailored to the needs of your business. Design thinking and data architectural principals guide the process to ensure business and technical alignment.

MANAGED SERVICES

Let our consultants take over and manage your IBM stack for you! Benefits include:

- Proactive, skilled, experienced technical staff
- On-call administration and operational support
- Proactive monitoring and reporting of applications, services, and performance
- Reduced costs, risks, and internal training
- Enhanced application performance
- Ongoing Configuration of ECM/ILG Components

CONSULTANCY

We are a top IBM Enterprise Content Management Consultant. Our team will work alongside you to operate the entire software stack to align business goals and vision to a solution roadmap. This can be either a single migration or a multi-phase solution addressing multiple business areas.
